HERE ARE SOME PHOTOS OF THE EXTERIOR FRAMING ON THE EAST FACE OF THE BUILDING. THE EXTERIOR FRAMING HAS NOW PROGRESSED TO THE FOURTH LEVEL.
AIR BARRIER

IN THESE PHOTOS YOU CAN SEE THE PROGRESSION OF THE FLUID APPLIED AIR BARRIER ON THE WEST FACE OF THE BUILDING AND IN THE PARKING GARAGE.
Evan is a Northwest native. He grew up in Bellingham, Washington and then attended the University of Washington. He majored in Architecture and Construction Management. After graduating in 2013 he started work at MacDonald-Miller.

He has worked for MacDonald-Miller since graduating from UW. Evan is MacDonald-Miller’s Project Manager for the Bates Technical College Project. His day-to-day tasks at Bates include being the first point of contact for all problems and solutions. He works with the GC, subcontractors, architects, engineers, and other team members to be able to complete his Mechanical and Plumbing work. Evan is excited to be working at Bates because he knows that project will benefit a lot of future professions in the region.

Outside work he is a home remodeler and wood worker. He currently spends most of his time fixing up a 1903 Victorian house.
HERE ARE SOME PROGRESS PHOTOS OF CMU BEING INSTALLED IN THE SOUTHEAST CORNER OF THE BUILDING.

BATES FACT OF THE WEEK: Bates got its name from L.H Bates who was the first school’s director in 1944.
The process for installing the TPO roofing has begun. Here are some photos from this week as Queen City is getting started.

“That’s the $64 dollar question.”
- Mike Curran
