This week Walsh Concrete continued to work on the Level 4 Deck South. They completed the installation of PT Tendons, Reinforcing, Conduits, and Penetrations. This was done prior to the placement on Friday.
THE PLACEMENT FOR LEVEL 4 SOUTH DECK OCCURRED ON FRIDAY MORNING.

“I’m a greater believer in luck, and I find the harder I work the more I have of it.”
– Thomas Jefferson
Jared was born in Northern California. He lived in Quincy, California until he was 9 years old. Then he moved to Littlerock, Washington. He attended Centralia College to get his associates degree and then transferred to BYU to major in Civil and Environmental Engineering.

After graduating from BYU, he worked for a few Structural Engineering Companies in Seattle and one Company in Indianapolis. He moved back to Tacoma 2 years ago to work for PCS Structural Solutions.

Jared said that some of the unique structural features on this project include the 3-story ramp that was built from part of the old ramp. Another interesting feature was that the lateral load for the building is only stabilized by the two stair cores.

Outside of work Jared likes to go hiking and camping with his family, be involved with his church, and does some framing on side.
“Just one small positive thought in the morning can change your whole day.”
– Dalai Lama

Here is a progress photo of the South Stair Core.
