Health Education***

North Level 3 Deck

The reinforcing and PT tendons were installed this week on the North end of the Level 3 Deck. This is in preparation for the concrete placement that will take place Monday.

South Level 4 Deck

The South Area of Level 4 was shored this week and the formwork was completed so that installation of the reinforcing could begin next week.

East Entrance

The above photo and rendering are of the East Entrance which is near the courtyard.

Toby Quesinberry

Toby was born and raised in Ohio. He attended the University of Toledo and the University of Miami, Ohio.

He started his professional career working at the Ohio Bell Telephone Company. After working there for a while Toby and a friend moved to Utah and bought and Electrical Contractors Company. He started in accounting and moved into estimating. He worked in Utah for 20 years before moving to Seattle. He has been living in Seattle for the last 20 years and works for EC Electric.

He is the project manager for EC Electric on the Bates Technical College Project. He has been working on the project from the beginning and helped with the Electrical design of the building. Toby said he is excited to be working with Bates, DES, and Walsh and is excited to provide a new facility that will benefit Bates students now and in the future.

Outside of work Toby likes to walk his dogs and go target shooting at the range.
