Slab on Grade

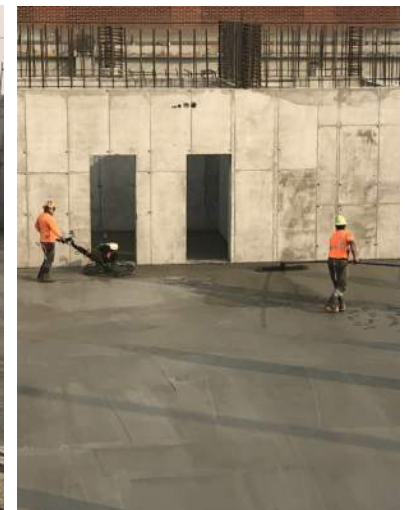

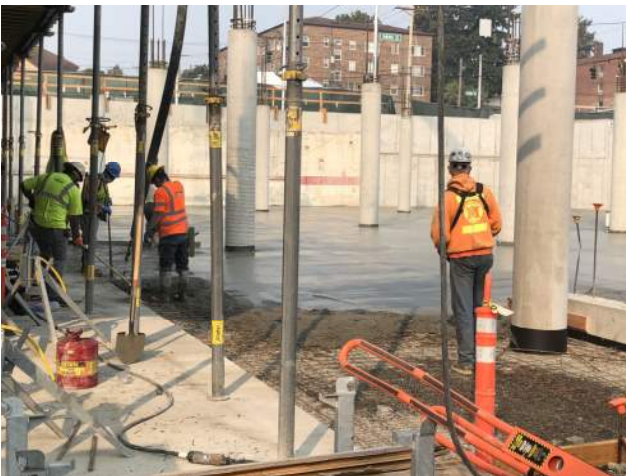

This week Titan and Walsh Concrete were preparing the soil and installing wire mesh for the Slab on Grade placement on Friday.

Slab on Grade Placement

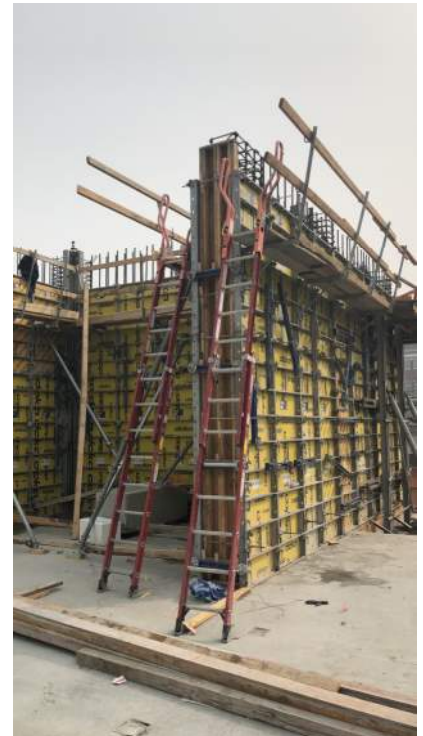

On Friday, the Slab on Grade was placed. In the photos below you can see part of the finishing process.

Level 2 Columns & Core

Earlier this week some of the Level 2 Columns were placed. The 2nd Level of the South Stair Core was also formed and placed.

Food Lifeline

The Walsh Project Team at Bates will be participating in Food Frenzy. This is a two-week event where we will be collecting canned goods to donate while competing against other jobsites. This will be occurring September 18th-October 2nd.

Jesse Crosby

Jesse Crosby is from Edmonds, Washington and grew up in Bothell. He attended Lynwood Highschool.

He first started working in construction in middle school because his dad was a General Contractor who built spec homes. He worked with his dad until he was in his early twenties. Then he decided to go fishing in Alaska for a few years. When he came back, he worked for his uncle for a little while until he decided to go work for another General Contractor. This is where he began to work with concrete. He has been with the union since 1998.

Jesse Crosby has been with Walsh for 5 years and is the General Superintendent for Concrete. His role at bates is to help support Whit (superintendent) and Logan (concrete superintendent). He has done this by setting up the concrete packages and helping plan the work.

In his free time Jesse likes to spend time outside. This includes hunting, fishing, wakeboarding, clam digging, crabbing, and backpacking/hiking. He also likes to spend time with his wife and 3 boys. They like to go camping and watch their sons play football on Friday nights.
