The Level 2 Deck Reinforcing was completed on Tuesday of this week in preparation for the concrete placement on Wednesday.
The Level 2 Deck Placement occurred Wednesday. These photos show the beginning of the concrete placement at the South end of the Deck.
The top photos show the completed placement of concrete before it has hardened. The bottom photos show the deck just a few hours later. This allowed for the surveyors to begin layout for the following days work.
Retaining Wall

During the deck placement Walsh Concrete finished forming the retaining wall on Yakima. Then the wall was placed. On Thursday, the Wall had hardened, and the formwork was stripped.
Level 2 Columns and Foundation Placement

Starting on Thursday the deck had harden enough to begin working on the next level. The surveyor had provided points that allowed for the Walsh Concrete team to begin forming the columns. The pink strands circled in red are points where an anchor was cast in place to provide support for the column formwork.

The last pour on Wednesday was for the foundation seen above near the North Stair Core.
Titan Earthwork backfilled the area South of the Main Entrance off Brazill in preparation for the rest of the Slab on Grade pour.

Kyle Nord

Where are you from?
Kyle is from Lacey, Washington but grew up in both Oregon and Montana.

What is your construction experience?
He has been with the Laborer’s Union and Walsh for almost 5 years now. He has worked on the JBLM Hanger and Air Traffic Control Tower, the Bremerton Fire Station, and the Denny Way Substation.

Out here at Bates he says he does a little bit of everything. This includes helping with rigging, epoxying rebar, and much more.

What do you like to do outside of work?
Outside of work Kyle likes to spend time with his wife and daughter. He also enjoys going golfing, hunting and fishing. His favorite golf course is Salish Cliffs. He is also a big sports fan and his favorite teams include the UW football team, the Seahawks, the Mariners, and the Trailblazers.
