

Information about ctcLink for students

In May 2022, Bates Technical College will move to a new system for student self-service. This new system, called ctcLink, will change the way you do all your college business.

Manage your entire college experience from your mobile device, laptop or home computer. Using the new online student center, you'll be able to do the following:

- View or update your student information and manage personal contact info.
- Register for classes, add and drop.
- Pay tuition and fees and handle financial aid processes.
- View your grades, track academic goals and apply for graduation.
- Contact your instructors or advisor.

ctcLink offers a more consistent experience across the Washington community and technical college (CTC) system. You'll have 24/7 access to an online student center, and so will your advisors and instructors. Your system ID credentials will also follow you within the state CTC system. Whether you complete your education at one college, transfer from one CTC to another, or attend two or more at once, everyone will use common online tools for everything from admission to graduation.

When will this change take place?

ctcLink is scheduled to go live for Bates Technical College during the weekend of May 5- 9. As we get closer to the go live date, you'll receive more information.

Various Student Services reduced May 9 - May 20*

Several offices will be closed or operating on limited hours from Monday, May 9 through Friday, May 20 to focus on the transition and ensure the data transfer was successful. They include Cashiering, Admissions, Business Offices, Registration, Financial Aid, WES, and Payroll. These offices will reopen on Monday, May 23.

Key Dates
