

Tips on before you begin using ctcLink

Navigating ctcLink (desktop/browser)

- **Do not use the back button** as you navigate in ctcLink. Information from previous windows you've left will be lost and are not retrievable.
- **If you encounter browser issues, good first steps to address this include clearing your browser cache and allowing pop-up windows.**

Clear web browser's cache, cookies, history

[PLEASE NOTE before you begin](#)

Clearing your web browser's cache, cookies, and history may remove data such as the following:

- Saved passwords
- Address bar predictions
- Shopping cart contents, etc.

While you should clear your web browser's cache, cookies, and history periodically in order to prevent or resolve performance problems, you may wish to record some of your saved information first.

[Troubleshooting alternatives](#)

If you need to clear your cache, cookies, and history for troubleshooting purposes, but aren't yet prepared to lose the content listed above, you may wish to consider using a private browsing window in your preferred browser as a temporary solution:

- Private Browsing (Firefox)
- Browse in private with Incognito mode (Chrome)
- Browse InPrivate (Microsoft Edge)
- Use Private Browsing (Safari on Mac)

[Instructions to clear cache may differ](#)

If the instructions below don't exactly match what you see, for your specific version or browser, search your browser's Help menu for "clear cache". If you're unsure what browser version you're using, from the Help menu or your browser's menu, select About [browser name].

[Tip to quickly open **menu** to clear browser cache](#)

For desktop browsers, to quickly open menus used to clear your cache, cookies, and history, ensure that the browser is open and selected, and press Ctrl-Shift-Delete (Windows) or Command-Shift-Delete (Mac).
